

## *New windows and doors – a quality investment*

*In today's world replacing your windows and doors can seem like a luxury but doing so isn't just a cosmetic choice. It's a great investment - as long as you choose wisely. We take a look at why Carrs Windows Ltd is the perfect choice to ensure value for money:*

### **You get high quality every time**

Carrs make all of their timber products in Skipton – choosing high-quality, durable materials that can last for decades. Carrs use Accoya timber, a specially treated wood which is water-resistant, weather resistant and resists rot. It can be painted to any colour of your choosing too – so you get all these great features without compromising on the look of your home. Alternatively, you can go for a stained which also really suits more traditional, country homes.

### **Products that keep you and your home warm**

Carrs timber products are also modified to be thermally efficient – the cutting edge, patented technology of Accoya keeps heat in and cold out. This can reduce energy bills in the long run and means you're not dreading those winter drafts.

### **Staff that care**

As a family run business, the team at Carrs are passionate about ensuring you get the right product for your home. They don't just sell timber windows and doors but also offer uPVC and aluminium. They will happily go through the different options to help you decide on the best choice for you, your family and budget.

### **The team are experts in our area**

Though sometimes travelling beyond the border to fit windows and doors, Carrs is based solely in the Yorkshire Dales, and Founders Marc and Leigh have lived in the area their whole lives. After over ten years in business, they've worked on all kinds of properties from listed buildings and Victorian terraces to new-builds and barn conversions.

This means they can really help when it comes to making material and cosmetic choices – ensuring your new windows and doors last for years to come.

For more information head to their website, give them a call, or book an appointment to visit the show area in Skipton.

*Made in the Dales to withstand the Dales*
